“ Cousin Steve lived across the street from me during our growing up years. Some of our younger years included riding our bikes, going to the movies, playing cowboys. What a great time! One of the interesting things I remember is when Steve's dad bought a push button car. Chrysler made several models during the mid-50's and mid 60's. Steve could really drive that car. Knew which buttons to push. I never could understand how you could drive a car by pushing buttons. But Steve could do it. We had a lot of fun. In High School he played football, I played basketball. After school he joined the Navy, I joined the Air Force. As you see, our lives went in different directions. But I will always remember. Those good memories are still there. Thank you for all of them

“ I've served John coffee every morning at Starbucks for 10yrs. or so. He helped me get my first computer. He was kind and would bring us breakfast. God speed. You're not in pain anymore! RIP

“ I remember the young playmate, cowboys and robbers, Davy Crocket, space aliens. I remember the youthful days of movie matinees with the latest serial edition and scary monster movies. I remember the teammate that played defensive tackle while I played defensive end. I remember the high school graduates and the war grabbing up everyone around us. I remember everyone joining up and going our separate ways into life. I remember my cousin Steve. Butch

“ I enjoyed working on elevators with "snufel" as we affectionately called him. He was always ready to share memories of the Navy as I also served in the Navy. I know he will be missed by all who knew him. RIP Mate.
